

EXPERIENCE

• Shopify

Toronto, ON, Canada

Senior Data Scientist

July 2022 - Jun 2026

- I have had the opportunity to dive deep into Shopify's marketing product ecosystem, collaborating with the product team to uncover insights on adoption, usage, and performance of various marketing tools.
- My work involved designing and executing A/B experiments to validate hypotheses, as well as generating insights to inform product direction.
- I also worked on data modelling and migrating data pipelines in PySpark and DBT to deliver essential analytical reports to Shopify's merchants.
- We exclusively leveraged Google Cloud Platform (GCP) and its associated ecosystem, including BigQuery, Composer, and DataFlow.

• Zendrive

Bengaluru, India

Senior Data Scientist

Jan 2021 - Jun 2022

- Zendrive is a telematics company that helps insurance companies provide usage based and driving behaviour based insurance to customers.
- I worked as the lead data scientist on the Public Transport Detection team. We developed algorithms based on map-matching and vehicular dynamics to classify trips as "car drive" vs "public transit".

• Microsoft

Bengaluru, India

Senior Data Scientist

Dec 2018 - Jan 2021

- I was part of the Bing Search Sponsored Ads team. We worked on optimization of ranking, allocation and pricing of sponsored search ads for all non-US markets.
- A key part of my work included building a real-time algorithm for ad layout optimization using reinforcement learning.

• Precision Wellness

San Francisco, CA

Data Scientist - Consultant

Feb 2018 - Nov 2018

- My main contribution was to help identify and build a statistical model for predicting risk of cardiovascular disease based on various risk factors, and scale the algorithm implementation to millions of patient records using Pyspark.

• Adobe

Bengaluru, India

Data Science Manager

Sep 2015 - Oct 2017

- I managed a small team of data scientists who focused on Adobe Media Optimizer, a search and display ad bidder.
- My team worked on real-time estimation and adaptive control algorithms for our display ad bidder and created a Python simulation environment to test various real-time bidding strategies for online auctions.
- We improved the efficiency of advertising spend by building accurate cost/revenue models from aggregated data and developing bid optimization algorithms.

• Pubmatic

Pune, India

Data Scientist

June 2013 - Sep 2015

- As a member of the horizontal machine learning team, I tackled a variety of challenges, often serving as a technical lead on revenue and infrastructure optimization problems.
- One of my main contributions was to build a classification model to filter out low-quality ad opportunities from billions of ad requests that reduced infrastructure usage by 12%.

- **TCS Innovation Lab**

Research Engineer

Pune, India

Nov 2011 - Jun 2013

- I applied my skills in diverse areas, from quantitative finance to human resources.
- I developed simulations in R to demonstrate the efficiency of Multi-level Monte Carlo techniques for pricing financial options.
- Collaborating with the HR department, I also worked on mining employee data to identify high attrition groups within the company.

EDUCATION

- **University of Illinois at Urbana-Champaign**

Master of Science in Applied Mathematics; GPA: 3.96

Urbana, IL

2009 – 2011

- **Indian Institute of Science**

Master of Engineering in Signal Processing; GPA: 7.4/8

Bengaluru, India

2006 – 2008

- **KJ somaiya College of Engineering**

Bachelor of Engineering in Electronics

Mumbai, India

2002 – 2006

PUBLICATIONS

- D. Shirodkar and S. Meyn, “Quasi stochastic approximation,” Proceedings of the 2011 American Control Conference, San Francisco, CA, USA, 2011, pp. 2429-2435, doi: 10.1109/ACC.2011.5991485.

SKILLS

- **Languages:** Python, SQL
- **Tools & Technologies:** Pyspark, Hadoop, Google Cloud Services, Bigquery, Looker Studio
